GO GREEN

Take Control of your Fleet's Idle Time

CALL US NOW! [+1 \(877\) 327-8526](tel:+1(877)327-8526)

ABOUT THE SYSTEM

Actively Manage Vehicle's Idle Periods

Emergency Vehicles spend the majority of their life idling. IdleFlex works alongside FastLane's control system, FastPlex, to allow for secure idle mode on the scene of your operation without the need to constantly idle the unit for the duration of the incident.

Intelligent

Only idles the vehicle during reduced voltage events, eliminating the need to have the vehicle idle for the entire incident duration.

Green Compliant

Provides fleets the much desired "green compliance" on their vehicles without the need to replace the entire fleet.

Saves Fuel, Reduces Emissions

The IdleFlex can greatly reduce a fleet's fuel consumption and helps lower their overall carbon emissions footprint.

THE STATS

How much can the IdleFlex system save your fleet?¹

Based on average fleet statistics with the IdleFlex equipped in five (5) vehicles, the system can save a department a significant amount of fuel, emissions and maintenance.

370

Gallons of Fuel

\$1,295

Fuel Savings

33,000

Miles Wear & Tear

\$550

Annual Maintenance

Contact your FastLane rep today to see how you can add IdleFlex to your next FastLane conversion.

¹ Based on average annual idle time of 200 hours per vehicle, average engine size of 3.5L, \$3.50/gallon of fuel, \$50 per oil change at 3,000 mile per cycle.
