FastLane
EMERGENCY VEHICLES

STANDARD ON EVERY VEHICLE

FastPLEX is fully programmable and multiplexed with advanced features such as full color touch screen control interface, integrated incident timers with audible alerts and complete monitoring capabilities for system wide control. FastPLEX monitors ALL FastLane added components meaning that you will no longer have to ensure that the truck is plugged in or remove the radios from the portable chargers before parking it. FastPLEX will monitor all loads and shutdown any item before the vehicle's battery system reaches critically low levels. Thus extending charging systems and battery life ensuring the vehicle is always "ready for service".

FEATURE	DETAILS
Chassis	Sprinter or RAM ProMaster
Lighting	All Major Brands Offered
Electrical Controls	FastPLEX Multiplexed, Standard
Rear Layouts	Fully Custom with 3D Rendering
Exterior Operations	Light Towers, Awnings, Etc.
Interior Lighting	Integrated LED cabinet lighting
Climate Controls	HVAC Add-on Systems, Cold Storage

Tower Light and Motorized Awning

FastLane offers many optional upgrades such as automatic tower lights to light up the scene, motorized awnings that automatically retract in high wind conditions to provide protection from the elements, and more. All items are integrated and can be controlled from one central location (or multiple locations) inside or outside the vehicle. Let FastLane outfit your next crime scene unit.

Fully Custom Rear Conversion and Cabinetry

Fully custom and built to suit your needs, FastLane offers robust interior conversion services including full 3-D CAD renderings and design, many finish options such as HD commercial flooring, cargo retaining solutions and e-track, custom storage cabinets, additional seating, dry-erase walls, laminate or solid surface counter-tops and much more.

Latest Tech and Surveillance Gear

Whatever your need, FastLane brings you the latest tech gear:

- Camera Systems (PTZ, Thermal)
- Communications (WiFi, Satellite)
- Displays (Static or Touch)
- Computer Racks & Networks
- Power Generation & Conditioning
- Auxiliary Cooling
